Subject: Prokopczyk A/J mouse study

Dear Robin,

Thanks for the abstract from Cancer Letters - the paper has already been ordered. The potential chemopreventive efficacy of p-XSC in NNK-induced A/J mouse lung tumorigenesis is nothing new. However, with all AHF studies there is something strange or not readily explainable. In this case, the claimed chemopreventive effect of p-XSC observed when fed to animals after initiation by NNK. The paper needs reading in full before I can make any further comment.

Best regards,

Tony
